DomusLift®

Your personal lift

made in Italy

DomusLIFT®
YOUR PERSONAL LIFT
DomusLift is the IGV Group outstanding and successful homelift, ideal for vertical transport requirements and for overcoming architectural barriers in both public and private buildings. It is the ideal solution for elderly persons and those with impaired mobility who gain independence and freedom from stairs.

The automatic sliding doors, available on request as an option instead of the standard panel landing door, offer a user-friendly use just like any traditional lift. The wide choice of accessories and finishes, together with S and XS versions, conceived for small spaces, and XL, designed for wide cars, makes DomusLift ideal for any requirements.

DomusLift perfectly fits any new or existing environment, while adding value to it.

10 good reasons for choosing DomusLift:
- Overcomes architectural barriers
- Compact, quiet and easy to install
- Power consumption like any household electrical appliance
- Connects to any electrical 230V outlet
- More than 50 models, for indoor and outdoor
- Standard panoramic glass door
- Reduced maintenance costs
- 3-year warranty
- Customised product
- Made in Italy
Elegance and style

The special models MADE WITH SWAROVSKI ELEMENTS, Liberty with Trend mosaic, Light-Touch by Giugiaro Architettura, Leather, Carbon, Chrome, Classic and Art Line, add exclusive style and elegance, while enhancing any environment.

DomusLift is a Made in Italy product, guaranteeing state-of-the-art technology by IGV Group. IGV Group is a company with headquarters in Milan (Italy). The company has had a leading role in the design and manufacturing of lifts and lifting platforms since 1966.
A user-friendly home

AS SIMPLE AS THAT
DomusLift quick installation procedure requires minimum builder's work, thanks to the reduced pit and headroom. The installation also needs limited regulatory approval and benefits from reduced maintenance costs and low energy consumption by using the standard household 230V mains supply.

SAFETY
The car is enclosed on three sides and the infrared barrier on the access side guarantees passengers' safety. The enabling key on the pushbutton panels prevents the use from unauthorised persons. In case of power failure, an automatic controlled device brings the car back to the landing and allows the exit of passengers.

ACCESSIBILITY
DomusLift offers a choice of extremely functional and customisable solutions with special accessories, such as the powered door opening and landing calls. DomusLift is an affordable solution ideal for those with impaired mobility or special needs.

VERSATILE
DomusLift is a truly all-around product, designed and manufactured to meet a wide range of needs and tastes. From the garage to the roof, DomusLift travels effortlessly up to seven floors.
Indoor and outdoor

ALUMINIUM SHAFT STRUCTURE
The aluminium shaft structure is exceptionally light and robust allowing to place DomusLift anywhere, even outdoor. It guarantees an enhanced usability of spaces without affecting the architectural context.

The structure is supplied as standard, the aluminium structure does not require any surface processing, it does neither deform, nor require any maintenance and it is weather-proof and does not change over the time.
MASONRY SHAFT
DomusLift can also be installed within your house in a special masonry or reinforced concrete shaft.
EXISTING BUILDINGS
Thanks to its versatility and flexibility, DomusLift is suitable also for the most challenging situations and allows the installation in any architectural context, both in new and existing buildings, buildings with historical constraints or featuring very narrow stair flights or reduced spaces.
DomusLift is the ideal solution for complete mobility within public and working areas. Thanks to DomusLift, shops and restaurants, shopping centres, offices, hotels and factories offer easy access to all levels.

Installation flexibility, large service capacity and elegant aesthetics are just some of the DomusLift key features.
Eco-sustainability

IGV Group focuses on energy saving and is fully committed to the safeguard of the natural environment.

DomusLift, the eco lifting platform, features a LED technology for the car lighting and is available in two versions: traction with inverter gearless motor for maximum performance and reduced consumptions, and hydraulic, with 100% biodegradable green oil (upon request).

DomusLift has been awarded the prestigious international certification of Class A energy efficiency by the certification bodies: TÜV SÜD and IMQ.
The S series allows the installation of DomusLift even in the narrowest shafts. The minimum car dimensions guarantee enough space for a trouble free movement. An elegant and refined solution, thanks to seamless single panel walls without aluminium profile, a wide range of finishes (plastic, painted and stainless steel laminate) and the same accessories as the standard model.

XS, the slimmest DomusLift ever. The new and extremely narrow DomusLift model is designed to fit the smallest shafts thanks to its extremely reduced dimensions. Shaft structure dimensions start from 65 x 91 cm.
Thanks to the car maximum dimensions up to 1200 x 1500 mm, the XL series offers plenty of space and high rated load. Also available with all-glass panels, guide rails wall excluded, up to three adjacent entrances.

The DomusLift range grows thanks to the chances offered by the European Machinery Directive 2006/42/EC. DomusLift is also available with 2-, 3- or 4-panel sliding automatic doors, featuring a reduced sill. The use of automatic doors allows for the elimination of the ‘hold-to-run’ operation by replacing it with the more practical and user-friendly APB (Automatic Push Button). In case of power failure, automatic return to landing and door opening are operated.
The DomusLift Classic range is designed for those who love the warmth and natural beauty of wood. The wood effect is obtained using a special painting method on the aluminium structure.

Classic style

DomusLift Chrome

Brand new geometries with perfectly matching combinations between steel surfaces with polished and satin finishes alternating on the car walls and creating a pattern of blank and solid areas.
Crystal clear

Crystal shine, transparency and elegance are combined with high tech design. A new exclusive DomusLift is born: DomusLift MADE WITH SWAROVSKI ELEMENTS, a triumph of steel, glass and precious reflections.

Designer: arch. Arianna Callocchia

Leather inner finishes

Leather is synonym of class, elegance and superior quality for interior environments and now is also available in the range of DomusLift walls, for a new concept of luxury.

Model with gold anodised aluminium shaft structure and door frame, bronze glass, Ivory leather wall and golden SuperFlat landing pushbutton panel.
DomusLift Carbon

DomusLift dresses black tie and wears new carbon-coloured finishes and a gorgeous wall made with flower decorated glass.

Artistic homelift

The Art Line is a highly artistic range. The classic stainless steel car becomes a décor component and perfectly fits any environment. It’s an all-new trend compared to traditional lifts.
The DomusLift elegance is further enriched with Giugiaro Architettura innovative lighting system, offering new in-car environments and atmospheres and the subtle sophistication of the touch screen control panel.

The unique Liberty mosaic made with handcrafted glass shapes lighting effects by alternating smooth and wavy, chromed and iridescent tiles, which enhance and beautify DomusLift surfaces.

Model with panel panoramic door, RAL 9010 painting for shaft structure, door frame and car profiles, bronze glass, car wall and floor with Liberty Amber mosaic.
Optional

LINE AND STYLE

LED lighting system embedded in the frame (only for automatic doors)
Retractable door closer
Endless car customisation options, thanks to the new printing technology on whatever material

COMFORT AND FEATURES

Mirror
Enabling key
Air conditioning system
Automatic swing door opening
Voice synthesiser when stopping at a landing
Fully operational remote control

INFOTAINMENT

Touch screen device with home automation interface
Digital frame
Interactive virtual window

SAFETY

Telephone* or two-way alarm device
Full-height infra-red barriers (only for automatic doors)
Flat handrail
Rounded handrail

* Standard device, except for other customer’s request

### WALL MOUNTED

**Satin stainless steel plate - STANDARD**

- Width: 150 mm
- Height: 299÷570 mm
- Depth: 1.5 mm

Also available polished stainless steel or golden stainless steel.

**Satin stainless steel SuperFlat**

- Width: 201 mm
- Height: 454÷634 mm
- Depth: 23 mm

Also available polished stainless steel or golden stainless steel.

It can be only coupled with SuperFlat landing pushbutton panel.

Upper and lower plastic caps painted in matching colours.

**Satin stainless steel full-height module**

- Width: 188 mm
- Height: 1980 mm
- Depth: 18 mm

Also available polished stainless steel or golden stainless steel.

---

1. Model for system with no car doors and with hold-to-run control.
2. Model for system with car doors and automatic operation.
3. Optional - Model with touch screen (115 x 130 mm) available for systems with or without car doors.
EMBEDDED IN THE HANDRAIL
Natural anodised aluminium flat handrail

Polished stainless steel rounded handrail

Landing pushbutton panels
Satin stainless steel plate - STANDARD
Satin stainless steel SuperFlat

Pushbuttons
ICARO
(74 x 70 x 2 mm)
Available for systems with or without car doors. For landing pushbutton panel, plate, SuperFlat and full-height module.

TRICOLOR
(83 x 150 x 5 mm)
Available for systems with or without car doors. For SuperFlat, full height module and pushbutton panel embedded in the aluminium flat handrail.

Display

Also available polished or golden anodised aluminium, with RAL painting or polyester painting.
Side plastic caps painted in matching colours.

Available only in polished stainless steel.

Also available polished stainless steel or golden stainless steel.

Also available polished stainless steel or golden stainless steel.

It can be only coupled with SuperFlat landing pushbutton panel.
Upper and lower plastic caps painted in matching colours.
Landing and car doors

SWING LANDING DOORS

**B-BT - STANDARD PANORAMIC ALUMINIUM**
Natural anodised aluminium door with ample glass or coated chipboard window. Standard door closer.

**FINISHES**
- Golden, polished or natural anodised aluminium
- Painting (RAL, wood effect and polyester)

**CAR FOLDING DOORS**

With manual or automatic opening. Available in aluminium (natural anodised or RAL painted) or satin stainless steel. It can be matched only with swing landing doors. It can be matched only with swing landing doors.
**Technical features**

**HYDRAULIC**
- Complying with European 2006/42/EC Machinery Directive
- Machine roomless hydraulic drive
- Direct telescopic suspension or roping version
- Load up to 300 kg
- Stops up to 7, travel 12 m
- Pit starting from 55 mm, headroom from 2350 mm
- Speed 0.15 m/s

Special features for XL model:
- Pit 120 mm min
- Headroom 2500 mm min
- Stops up to 7, travel 17 m
- Rated power 2.2 kW for 400 kg load
- 1 or 2-piece ram

**ELECTRIC GEARLESS WITH COUNTERWEIGHT**
- Complying with European 2006/42/EC Machinery Directive
- Machine roomless (MRL)
- Gearless machine, with counterweight
- Load up to 400 kg
- Stops up to 7, travel 20 m
- Pit 200 mm, headroom 2500/2600 mm
- Speed 0.15 m/s
- Extremely silent (50 dBa)
- Minimum consumptions (0.031 kW in standby)

**Power unit**

The standard controller is provided in a special cabinet of small dimensions. It can be easily installed in the cellar or garage, because it can be installed up to 7 metres far from the DomusLift.

Cabinet dimensions:
1. DomusLift hydraulic: 600 x 280 x h 1000/1160 mm
2. DomusLift electric gearless with counterweight: 600 x 280 x h 1160 mm
   Model embedded in the door frame: 370 x 200 x h 2285 mm.
3. DomusLift XL hydraulic: 720 x 360 x h 1500 mm for travels up to 13 m
   950 x 400 x h 1850 mm for travels >13 m

Cabinet supplied as standard with RAL 1015 painting.
Leading company in the production of customised products since 1966

Founded by Giuseppe Volpe in 1966, IGV Group is worldwide renown for the design and production of Domuslift lifting platforms and lifts with reduced pit and headroom. IGV exports to more than 70 countries 70% of its total production, representing the excellence of Made in Italy. For more than 50 years, IGV has been designing and manufacturing thousands of solutions for the vertical mobility, specialising in bespoke systems and exporting worldwide the Made in Italy style and innovative technology.
